

BARRE DUOMI - STRUT BRACES
BARRAS DE REFUERZO DE SUSPENSION

- Derivate dalle competizioni, dove vengono utilizzate su tutte le vetture, sono disponibili in più di 200 modelli specifici per essere installate su tutte le principali vetture presenti nel mercato.
- Disponibili in Acciaio o in Alluminio trattato SHT, sono dotate di un sistema di regolazione che ne migliora la rigidità e ne facilita l'installazione.
- L'uso della barra migliora la precisione di guida in curva e contribuisce a mantenere stabili gli angoli che regolano la geometria delle sospensioni.

- Used in all cars during the races the strut braces are available in more than 200 specific models.
- Available in steel or in aluminium SHT treated, they are equipped with an adjustable system that increase the rigidity and allows an easier fitting.
- Strut braces help to maintain the correct suspension geometry providing much needed rigidity at suspension points.

- Directamente traído de las carreras, donde han sido usados por todos los coches, hay más de 200 modelos específicos para instalarse en los modelos más punteros, disponibles en acero o aluminio SHT tratado.
- Además están equipados por un sistema ajustable que mejora la rigidez y permite una fácil adaptación al movimiento.

- Speciale trattamento sviluppato dai tecnici Sparco, migliora le caratteristiche meccaniche dell'alluminio aumentando la rigidità.
- Special treatment developed by Sparco improves the aluminium mechanical features increasing rigidity.
- El especial tratamiento desarrollado por Sparco, mejora las características técnicas del aluminio, ofreciendo mayor rigidez.

LEGENDA:	
VC = Regolazione con vite centrale - Adjustment with central bolts	e - Disponibile anche nei colori azzurro e giallo
2VL = Regolazione con due viti laterali - Adjustment with 2 side bolts	Available also in light blue and yellow colours
2UN = Regolazione con due Uniball - Adjustment with 2 Uniball	f - Ammortizzatore con quattro bulloni - Shock absorber with 4 bolts
3P = Barra smontabile in tre pezzi (piattelli smontabili) - Bar dismountable in 3 pcs.	g - Ammortizzatore con tre bulloni - Shock absorber with 3 bolts
NR = Barra non smontabile e senza regolazione - Bar non dismountable and w/o regulation	h - Modelli a carburatore - Carburetor models
Fe = Acciaio Fe 37 diametro 28 mm - Steel Fe 37 diameter 28 mm.	i - Modelli a iniezione elettronica - Electronic injection models
Al = Duralluminio diametro 30 mm - Alluminium diameter 30 mm.	m - Il montaggio richiede modifiche di una certa entità
Ant. = Anteriore - Front	Installation needs quite big modifications
Post. = Posteriore - Rear	n - E' necessario tagliare le paratie in terne del vano motore
Inf. = Inferiore - Lower	It's necessary to cut the inside engine protections
Viti = Ammortizzatori di serie senza prigionieri - Original shock absorbers W/o prisoners	o - Versioni senza ABS - Versions without ABS
Per il montaggio è necessario forare i duomi.	p - Versioni con ABS - Versions with ABS
Viti e dadi per il montaggio, forniti nella confezione	q - Versioni con idroguida - Versions with power steering
	r - Anodizzata nera - Anodized black
	s - Barra testata anche su vetture con guida a destra.
	Bar tested on right-hand steering also
N = NOTE:	
a - Doppio tubo - Double tube	
b - Tubo diametro 40 mm - Tube diameter 40 mm.	
c - Rinforzo differenziale posteriore - Reinforcement on rear differential gear	
d - Puntoni barra antirollio - Anti-roll strut bar

DISTANZIALI - SPACERS
DISTANCIADORES DE RUEDAS

• Prodotti in una speciale lega in alluminio mediante un'innovativa tecnologia di forgiatura, sono successivamente lavorati con macchine a controllo numerico per ottenere la perfetta coplanarità. Vengono inoltre sottoposti ad un ulteriore trattamento termico per incrementare la resistenza meccanica e successivamente anodizzati per garantire la protezione dall'ossidazione. Disponibili nella più grande gamma d'applicazione del mercato, vengono forniti completi di bulloni ruota e viti per il fissaggio al mozzo della ruota. L'adozione di distanziali ruota determina l'incremento della carreggiata migliorando la precisione nella guida rendendo la vettura più facile, sicura e piacevole da guidare. **Importante:** l'adozione dei distanziali modifica la geometria delle sospensioni, che necessitano per tanto di una successiva revisione dell'assetto.

• Developed in a special aluminium alloy through an innovative forging technology, afterwards they are wrought with CNC machine (computer numerical control) to obtain the perfect coplanar surface. They are heat treated to increase the mechanical resistance and next they are anodized to guarantee the oxidation protection. The application table includes the most popular application available in the market, bolts and studs included. The wheel spacers increased the track improving the driving precision. **Important: the use of wheel spacers modify the suspension geometry, that needs to be revised afterwards.**

• Desarrollados con una aleación de aluminio especial mediante una tecnología innovadora de moldeado, se ha forjado con una máquina CNC controlada por ordenador para conseguir un acabado perfecto en la superficie. Son tratados bajo temperatura para aumentar la resistencia mecánica e inmediatamente anodizados para garantizar la protección contra la oxidación. Disponibles en una alta parte del mercado, incluyen tornillos y tuercas. El uso de distanciadores de ruedas mejora la conducción en calzada y la sensación de placer en la conducción. **Importante: el uso de distanciadores de ruedas modifica la geometría de la suspensión, que necesitará una revisión inmediata.**

Per una corretta installazione del kit distanziali SPARCO, prima di procedere al montaggio è necessario eliminare accuratamente con una spazzola metallica eventuali depositi di polvere o ruggine dai mozzi ruota.

1	Installabili solo sull'asse anteriore
2	Con i distanziali da 5 mm di spessore normalmente non è necessario sostituire i bulloni o le colonnette originali, consigliamo comunque di verificare che la lunghezza utile del filetto sia pari almeno al diametro dello stesso.
3	Su alcuni modelli utilizzabile solamente nell'asse posteriore, perché il mozzo di centraggio dell'asse anteriore sporge molto.
4	Mazda può montare delle colonnette differenti da anno ad anno e da modello a modello. Controllare sempre i diametri dello zigrino millerighe dell'asse anteriore e posteriore. Le colonnette incluse nel kit hanno un diametro zigrino di 13mm.
5	Il kit viene fornito di bulloni con chiave da 19 per cerchi after market con sede conica.
6	Il kit viene fornito con colonnette da 70mm con diametro zigrino di 15mm.
7	Nissan e Subaru possono montare delle colonnette differenti da anno ad anno e da modello a modello. Controllare sempre i diametri dello zigrino mille righe dell'asse anteriore e posteriore. Le colonnette incluse nel kit hanno un diametro zigrino di 14,2mm
8	Mitsubishi può montare delle colonnette differenti da anno ad anno e da modello a modello. Controllare sempre i diametri dello zigrino mille righe dell'asse anteriore e posteriore. Le colonnette incluse nel kit hanno un diametro zigrino di 14,2mm.
9	Qualora lo spessore del distanziale fosse inferiore alla lunghezza della colonnetta originale, non sarebbe garantito il corretto contatto tra cerchio e distanziale. Provvedere in questo caso ad accorciare la colonnetta in modo adeguato
10	Installabile solamente con cerchi in lega originali
11	Installabile solamente con cerchi in lega After Market

BRAKE LINES

LINEA-R

- Realizzati con materiali di tipo aeronautico ad alta resistenza, sono costituiti da un condotto in Teflon rivestito da una calza metallica intrecciata e raccordi di sicurezza. Perfettamente interscambiabili con i tubi originali in gomma, eliminano l'effetto del pedale "lungo" quando l'impianto frenante viene sollecitato, la maggiore rigidità del tubo consente di dosare al meglio la frenata anche nelle condizioni più severe.
- These kits are made of high-strength aircraft quality materials with Teflon hose covered with a metallic stocking and safety connection. Perfectly interchangeable with the original rubber hoses, remove the effect of the "long" pedal when the brake system is stressed. The higher rigidity of the hose allows to control the brake even if in bad conditions.
- Realizados con material de tipo aeronáutico de alta resistencia, realizados en Teflon cubiertos con un material metálico. Son perfectamente recambiables con un los tubos originales de goma, comparados con los cuales, ofrecen una mayor resistencia a la abrasión y firmeza en el pedal. Esta mayor rigidez en los tubos, permite mejorar el control de frenado incluso en condiciones desfavorables.

NOTE:

a = La misura del centrale è riferita ad un singolo tubo - The size of the central is referred to a single tube

b = I due tubi posteriori destro e sinistro hanno raccordi e misure diversi fra loro - The two left and right rear tubes have different connections and sizes

LEGENDA:

MF = Maschio fisso - Male fix

MG = Maschio girevole - Male sliding

FF = Femmina fissa - Female fix

UNIVERSAL AIRBOX

HP300

- Filtro aria universale
- Sviluppato per vetture fino a 300 hp di potenza
- Kit di montaggio universale incluso
- Necessita la modifica all'impianto di aspirazione

- Universal air filter
- Intended for cars which develop up to 300 bhp
- Includes universal assembly kit
- Requires some modification of the air intake assembly

- Filtro de aire universal
- Desarrollado para automóviles de hasta 300 hp de potencia
- Juego de montaje universal incluido
- Precisa una modificación de equipo de aspiración

030HP300
